

The 8th International Symposium on Emerging Viral Diseases

October 20-22, 2018

Wuhan, China

(First Announcement)

Emerging viral diseases pose a great threat to global public health, and become hotspots and key topics in life science and medical research. Aiming to foster global research exchanges and collaborations in the field of virology, the 8th International Symposium on Emerging Viral Diseases (ISEVD) will be held on October 20-22, 2018 in Wuhan. This symposium gathers reports on outstanding scientific achievements in a variety of research fields including emerging viral pathogens, viral-host interaction, antiviral immunity and arboviruses. It will specially organize invited talks, panel discussions and academic posters to present the latest developments in the related areas, and to explore the frontiers of emerging viral diseases. This symposium will provide global researchers an open, high-quality communication platform for exchanging the state-of-art research and developments, and for strengthening collaborations and communications.

We warmly welcome domestic and international scholars, researchers and graduate students to participate this symposium. We look forward to meeting you at Wuhan in October!
